

FULL MOON TAROT

May Full Moon in Sagittarius

MIND - EMOTIONS

King of Pentacles

This full moon focuses on the **successful achievements & culmination of the last 12 months**, so it makes sense to see the King of Pentacles sitting on his throne. This Sagittarius **adventurous energy is a time for expansion** and being **open to new possibilities**. However this might mean you need to **let go of old mindsets and beliefs** (anything that's holding you back). This will then allow you to step into your power and own who you truly are. Like the steadfast king you'll need **clarity about the resources, knowledge, capability and skills you need** for the change. As with the arrow of sagittarius you can then focus your mind on the **new vision you want to create for the future** and watch your transformation unfold.

BODY - BEING

Five of Cups

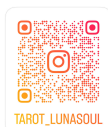

You are being urged to **honour and accept your body** for the gift it is. This full moon asks you to also feel into where you **might need to make changes**, particularly if you feel limited by your body. Are there any **niggling problems** you have been ignoring or health issues that need your attention? **Seek support**, help and/or **guidance** from a professional where required. With this **expansive & regenerative** Sagittarius energy it's a reminder **you are always evolving** and change is a big part of life. Make **changes for your health and wellbeing** even the small ones to connect your physical being to the power of your subconscious.

SPIRIT - SOUL

The World

The World card symbolises **coming full circle**. In the energy of Sagittarius it's a wonderful time to **see projects or a creative venture to completion**. This full moon is all about **soul cycles, natural endings and beginnings** especially when it comes to something you're passionate about. Sagittarius will seek out the **deepest truths about your souls journey and evolution**. It's a really good time to wrap up, resolve, and let go of anything that does not align with this or match energetically. In doing so **creating space for the new** so you can **step freely into your highest & limitless possibilities**. Step towards your future and materialise your **soul's potential in this physical world**.
